

$$1) (\sqrt{m} - 3\sqrt{p})(2\sqrt{m} + \sqrt{p}) \rightarrow 2m + \sqrt{mp} - 6\sqrt{mp} - 3p$$

$$2m - 5\sqrt{mp} - 3p$$

$$2) \frac{-2}{6(x-1)} - \frac{4}{(x-1)} \rightarrow \frac{-2 - 4(6)}{6(x-1)} \rightarrow \frac{-26}{6(x-1)} \rightarrow \frac{-13}{3(x-1)}$$

3) Period of $\cot\left(\frac{3t}{2}\right)$ period of $\cot(t)$ is π $\frac{\pi}{\frac{3}{2}}$ $\left(\frac{2\pi}{3}\right)$

4) Parallel to $3x - 4y = 10$ and goes through $(5, -2)$

$$3x - 10 = 4y$$

$$\frac{3}{4}x - \frac{10}{4} = y$$

$$m = \frac{3}{4}$$

$$y = m(x - x_1) + y_1$$

$$y = \frac{3}{4}(x - 5) - 2 \rightarrow y = \frac{3}{4}x - \frac{15}{4} - \frac{8}{4}$$

5) Perpendicular to $3x - 4y = 10$ $(5, -2)$

$m = \frac{3}{4}$ perpendicular lines have neg reciprocal slopes

$$M = -\frac{4}{3}$$

$$y = -\frac{4}{3}(x - 5) - 2 \rightarrow y = -\frac{4}{3}x + \frac{20}{3} - \frac{6}{3} \rightarrow y = -\frac{4}{3}x + \frac{14}{3}$$

6) $\tan(x)$

The Community College Student Jennifer Dudley,2010

Community College Mathematics Brian Cafarella,2022-06-29
This book explores the rich history of community college math with a specific focus on gatekeeper math classes
Gatekeeper math classes include courses such as college algebra introduction to statistics and all developmental math classes
For community colleges successful completion of these classes is imperative for student retention
This book presents a decade by decade analysis of the history of community college mathematics
The author employs a mix of conceptual empirical and quantitative research
The empirical research stems from interviews with 30 community college faculty members from seven community colleges
From the 1970s to the pandemic in the early 2020s the book explores math curricula as well as trends initiatives teaching practices and mandates that have impacted community college math
The positives and negatives of such trends initiatives and mandates are presented along with suggestions on how to apply such knowledge going forward
The author addresses the key questions
How can we build a future model for community college gatekeeper math classes that is both successful and sustainable
Additionally how can we learn from the past and the present to build such a model
This book will be ideal for students in graduate programs focusing on community college leadership or developmental education leadership as well as all those hoping to improve success rates in community college mathematics programs

unproctored groups as well as student persistence Analyzing mean course grades I found that differences in grades between students who take a proctored and unproctored math placement test continue in some cases into the second math course The percentage of F s and withdrawals for initial and second math course final grades between students who take a proctored and unproctored math placement assessment also show differences between groups Applying hierarchical linear regression suggests that test administration modality does not account for a significant amount of variance in course grades When controlling for demographic characteristics and academic factors performance from the initial course taken was found to be the most significant factor of grades in second math course taken Results from the current study suggests that test administration modality during math placement tests while not a statistically significant variable in academic performance in second math course taken may still be helpful as it is a statistically significant variable in academic performance in the first math course taken Since initial math course grades were statistically significant in explaining the difference in grades between groups institutions should consider using proctoring during math placement tests as a practice Further research should be conducted however to understand how test administration modality during placement tests affects students in different programs including programs that do not require courses along the institution s math course sequence Additionally further research on types of proctoring would provide a more comprehensive understanding of the proctoring options available to institutions and whether they result in the same outcomes for students

College Knowledge David T. Conley,2008-01-28 Although more and more students have the test scores and transcripts to get into college far too many are struggling once they get there These students are surprised to find that college coursework demands so much more of them than high school For the first time they are asked to think deeply write extensively document assertions solve non routine problems apply concepts and accept unvarnished critiques of their work College Knowledge confronts this problem by looking at the disconnect between what high schools do and what colleges expect and proposes a solution by identifying what students need to know and be able to do in order to succeed The book is based on an extensive three year project sponsored by the Association of American Universities in partnership with The Pew Charitable Trusts This landmark research identified what it takes to succeed in entry level university courses Based on the project s findings and interviews with students faculty and staff this groundbreaking book delineates the cognitive skills and subject area knowledge that college bound students need to master in order to succeed in today s colleges and universities These Standards for Success cover the major subject areas of English mathematics natural sciences social sciences second languages and the arts
