*IPHA - An Open Source Framework for Development of Strategy Games based on Microsoft Technology*  
Jacob Barkai, 2009-07-28  
Professorial Dissertation from the year 2009 in the subject Computer Science Theory grade 90  
Tel Hai Academic College language English abstract  
Strategy computer games are nowadays a very popular and exciting genre in the world of computer games  
Many succeeding commercial games were developed since the end 1980 s and contributed to the growth and interest in computer games in general and strategy games in particular  
Games such as Command Conquer™ series by Westwood and EA Studios Civilization™ series by Sid Meier Warcraft™ and StarCraft™ series by Blizzard entered to the computer games hall of fame thanks to their inventiveness artificial intelligence challenge and visual effects that they offer  
Almost every strategy computer game was based on the idea of an electronic board game a modern brother to the classic physical board games such as chess checkers backgammon hexxagon and more  
An interesting issue is the fact that both the classic board games and the modern strategy computer games are sharing many of the key elements that make the players think and act strategically and tactically according to the development of the game  
This issue is the basis for the project and discussed further in the next pages  
It is common to divide strategy games into two main types  
Abstract strategy where there is perfect information regard to the game s state  
An example for an Abstract strategy is Chess  
The other type is Concrete strategy where there is incomplete information regard to the game s state  
This characteristic makes the game more interesting and surprising  
An example for such a game is Stratego  
This project aims to serve as an open source code framework written under Microsoft NET for easy creation and expansion of abstract strategy games by providing operational artificial intelligence algorithms and well defined class libraries based on concepts taken from the game theory for decision making aspects  
PLEASE NOTICE This document contains the complete theoretic information regard the subject  
Yet the source code of the project is NOT part of the document as well as the API manual
