Passive Structures in Singapore English Dominik Lorenz,2007-05-02 Seminar paper from the year 2006 in the subject American Studies Linguistics grade 2 University of Freiburg course Proseminar I language English abstract Ho and Platt 1993 1 argue that Singaporean English is a particularly interesting indigenized or nativized speech variety because it is so widely used and fills so many functions I can confirm Ho and Platt s statement since I was in Singapore in 2004 It was not difficult to notice Singapore English as a speech variety This sparked my interest in participating in the proseminar English in Singapore and consequently in researching into a certain grammatical phenomenon in Singapore English namely the passive voice In this term paper a short analysis of the two passive structures specific to Colloquial Singapore English the so called kena passive and the give passive will be presented Further on we the get passive will be examined We will show that give and kena constructions are derived from the languages of Chinese and Malay respectively The bigger part of this paper will be to examine the overall frequencies thereof Which of the two passive constructions will be closer in structure to the standard form A personal analysis will help us to answer this question always with the hidden desire to finally come up with a reasonable conclusion towards the end of the paper We will probably have a winner of the competing substrate form and we will hopefully find out which passive construction is the most productive one in Singapore English Moreover we want to compare the frequency of the kena passive with the getpassive s frequency in a corpus based analysis Admittedly the corpus based study will be relatively restrictive and not quite large in size In addition the give passive will be ignored due to its rarity Further on we want to compare passive voice in Singapore with the passive in Standard English To manage this after having presented the development of Singapore its multilingualism and English as its most common language we will define some basic terms which will be used in this term paper After that we will explain the corpus and the methodology used In the end we will sum up the findings and we will discuss my own study Perhaps there are possibilities how to do it better next time or there are other things that could be done

Seminar paper from the year 2009 in the subject English Language and Literature Studies Linguistics grade 1 0 University of Cologne Englisches Seminar course Syntactic structures of English language English abstract The English grammar has many similarities with the grammar of German since both have their roots in the Germanic languages Therefore English and German share lexical and structural but also semantic properties In order to deepen one s understanding of these properties this paper will deal with differences and similarities of the English and German verb system Transitivity alternation is based on the syntactic distinction of verbs that are divided into transitive and intransitive verbs This paper deals with both verb categories taking into account semantic matters as well In English and in German a verb can express the way in which an action affects its object which is part of the so called ergative model This model shall be introduced in Chapter 2 with examples of the English language After the introduction to the usage of ergative verbs a comparison of English and German structures follows in Chapter 3 Mistakes of translation are often due to structural and semantic differences within the ergative model English and German verbs do not always provide the same variety of possibilities to express an action therefore it shall be shown in Chapter 3 1 in which language the verb system is more flexible in regards to ergative processes Chapter 3 2 deals with morphosyntactic differences of German and English within the ergative model As the German structure shows similarities as well as differences to the English verbs an attempt is made in Chapter 4 to discover potential semantic distinctions within those German verbs that either differ or resemble the English structure The aim of this paper is to bring out a comparison of the English and German language that gives an insight into their verb systems in regards to syntactic as well as semantic properties *University High School Journal* ,1925 **Standards in English** John Joseph Mahoney,1917 **Lessons in English** Arthur Lee,1917 **English Patents of Inventions, Specifications** ,1877
