How long has honey been around? This is a question that has puzzled scientists for centuries. Honey is a natural sweetener that has been used for thousands of years. ### WHAT'S SO SPECIAL ABOUT THE PISTACHIO NUT?

Pistachios are one of the oldest nuts in the world. They have been around for over 7,000 years and originated in western Asia. Pistachios are a member of the Anacardiaceae family, which also includes mangoes, cashews, and poison ivy. Pistachios grow on trees that can reach up to 20 meters tall. The trees blossom in the springtime and produce fruit in the summer months. The fruit is small and green with a hard outer shell. Inside the shell is the kernel, which is what we eat as a nut. Pistachios are high in fiber, protein, potassium, vitamin B6, and thiamin. They also contain healthy fats, which can help reduce bad cholesterol levels and lower your risk for heart disease. There are many reasons why pistachios are special. But most importantly, pistachios are delicious! Their unique flavor makes them a popular choice for snacks and desserts.
