New Ecology for Education — Communication X Learning Will W.K. Ma, Chi-Keung Chan, Kar-wai Tong, Heidi Fung, Cheuk Wai Rose Fong, 2017-05-18 This book gathers the best papers from the HKAECT AECT 2017 Summer International Research Symposium Revealing the complex interactions between communication and learning which are represented by the symbol X in the title it provides a platform for knowledge exchange on the new ecology for education in the digital era It also equips readers to handle complex issues in both communication and education and clarifies the difference between practitioners and academics in communication and in education

Ecocriticism, Ecology, and the Cultures of Antiquity Christopher Schliephake, 2016-12-07 Although current environmental debates lay the focus on the Industrial Revolution as a sociopolitical development that has led to the current environmental crisis many ecocritical projects have avoided historicizing their concepts or have been characterized by approaches that were either pre historic or post historic while the environmental movement has harbored the dream of restoring nature to a state untouched by human hands there is also the pessimistic vision of a post apocalyptic world exhausted by humanity's consumption of natural resources Against this background the decline of nature has become a narrative template quite common among the public environmental discourse and environmental scientists alike The volume revisits Antiquity as an epoch which witnessed similar environmental problems and came up with its own interpretations and solutions in dealing with them This decidedly historical perspective is not only supposed to fill in a blank in ecocritical discourse but also to question problematize and inform our contemporary debates with a completely different take on nature and humanity's place in the world Thereby a productive dialogue between contemporary ecocritical theories and the classical tradition is established that highlights similarities as well as differences This volume is the first book to bring ecocriticism and the classical tradition into a comprehensive dialogue It assembles recognized experts in the field and advanced scholars as well as young and aspiring ecocritics In order to ensure a dialogic exchange between the contributions the volume includes four response essays by established ecocritics which embed the

sections within a larger theoretical and practical ecocritical framework and discuss the potential of including the pre modern world into our environmental debates
