

ENOVIA Engineering Central

ENOVIA® Engineering Central™ addresses key global product development challenges by eliminating the significant process and data communication barriers that exist between mechanical, electronics, and software engineering disciplines within the enterprise and the product supply chain. With ENOVIA Engineering Central, companies can aggregate input from all design disciplines into a single enterprise-wide definition of the engineering bill-of-materials (EBOMs). All functions throughout the company access the same EBOM information resulting in improved innovation, decision making, quality, and process throughput.

Key Benefits

- Consolidate part design and related technical document content from multiple engineering tools by providing a single definition of the EBOM
- Increase product innovation through improved communication and collaboration with global development teams leveraging 3D visualization and electronic communication including email and ad-hoc workflow
- Leverage skills and knowledge of the enterprise and supply chain through institutionalization of cross-functional product development and engineering change processes
- Use analysis reports that quickly identify component usage, highlight differences between assemblies, and summarize design changes over time
