

# Some of the most complex IT infrastructures are driven by the IBM Power Systems

Running on POWER9 technology, IBM Power Systems is a family of servers used for the most demanding business applications – from large-scale logistic systems requiring maximum processing capacity to banking and insurance platforms where reliability is critical.

With IBM Power, you can reach the expected level of performance using a much lower number of servers than in alternative solutions. That explains why they have been implemented by **70% of companies featured on the Fortune500 list**. Also, bear in mind that some of the **most powerful supercomputers in the world** were built using this technology.
