**Auravana Project Plan** Auravana, 2022-07-12. This publication is the Project Plan for a community type society. A societal level project plan describes the organized thinking and execution of a socio-technical environment, the societal structuring of community. This project plan identifies humanity's project to create a global community type society for the fulfillment of that which everyone has mutually in common. This is a planned project for a configuration of society that may be tested in its results at optimally meeting all human life requirements at the global scale. This is a planning and work proposal for an open source societal level project. This document describes and explains a unified approach to actions and results that is likely given what is known and accessible to improve all of humanity. This is the plan for societal navigation that specifies an approach, direction, and execution to socio-technical life. The project plan has three core sections: 1. Approach to project execution, 2. Direction of project execution, and 3. Execution of project execution. The standard details the complete plannable information set for the society's operation, including its approach to action, its direction of action, and its execution and adaptation of action. Herein, these concepts, their relationships, and understandings are defined and modeled. Discursive reasoning is provided for this specific configuration of a project plan as opposed to the selection and encoding of other configurations. A project plan provides for the formalized project based development operation of a society organized in time and with available resources coordinated to become a societal service system for human fulfillment and ecological well-being.
