2	Use of all steps of the engineering design process is evident.	The build and all parts were completely stable.	Materials were used creatively and exhibited out of the box thinking.	The overall build design was unique and represented equal amounts of thought in all areas of the build.	The student fully cooperated with the group and contributed fairly.
1	Some steps of the engineering design process is evident.	The build was completed but not completely stable or parts were falling off.	Some creativity was used in the placement of materials on the build.	Some elements of the design were strong, but some areas had weaknesses.	The student had some issues collaborating with the group and/or contributing fairly.
0	None of the steps of the engineering design process is evident.	The build could not stand on its own.	Very little thought was put into the placement of materials on the build.	The overall design represented a build that needed more thought.	The student spent most work time arguing and/or not contributing to the build.
