Chapter 1

Problem 1.1

A nucleus, originally at rest, decays radioactively by emitting an electron of momentum $1.73 \text{ MeV}/c$, and at right angles to the direction of the electron a neutrino with momentum $1.00 \text{ MeV}/c$. (The MeV (million electron volt) is a unit of energy, used in modern physics, equal to $1.60 \times 10^{-6} \text{ erg}$. Correspondingly, MeV/c is a unit of linear momentum equal to $5.34 \times 10^{-17} \text{ gm-cm/sec.}$) In what direction does the nucleus recoil? What is its momentum in MeV/c ? If the mass of the residual nucleus is $3.90 \times 10^{-23} \text{ gm}$, what is its kinetic energy, in electron volts?

Place the nucleus at the origin, and suppose the electron is emitted in the positive y direction, and the neutrino in the positive x direction. Then the resultant of the electron and neutrino momenta has magnitude

$$|\mathbf{p}_{e+\nu}| = \sqrt{(1.73)^2 + 1^2} = 2 \text{ MeV}/c,$$

and its direction makes an angle

$$\theta = \tan^{-1} \frac{1.73}{1} = 60^\circ$$

with the x axis. The nucleus must acquire a momentum of equal magnitude and directed in the opposite direction. The kinetic energy of the nucleus is

$$T = \frac{p^2}{2m} = \frac{4 \text{ MeV}^2 c^{-2}}{2 \cdot 3.9 \cdot 10^{-23} \text{ gm}} \cdot \frac{1.78 \cdot 10^{-27} \text{ gm}}{1 \text{ MeV } c^{-2}} = 9.1 \text{ eV}$$

This is much smaller than the nucleus rest energy of several hundred GeV , so the non-relativistic approximation is justified.

El-Hi Textbooks and Serials in Print, 2006 Forthcoming Books Rose Army, 2003 A Brief Introduction to Fluid Mechanics Donald F. Young, Bruce R. Munson, Theodore H. Okiishi, Wade W. Huebsch, 2010-11-23 A Brief Introduction to Fluid Mechanics 5th Edition is designed to cover the standard topics in a basic fluid mechanics course in a streamlined manner that meets the learning needs of today's student better than the dense encyclopedic manner of traditional texts This approach helps students connect the math and theory to the physical world and practical applications and apply these connections to solving problems The text lucidly presents basic analysis techniques and addresses practical concerns and applications such as pipe flow open channel flow flow measurement and drag and lift It offers a strong visual approach with photos illustrations and videos included in the text examples and homework problems to emphasize the practical application of fluid mechanics principles **Eye, Ear, Nose and Throat; A Manual for Students and Practitioners** Howard Charles Ballenger, 1917 *Experiments in Personality: Volume 2 (Psychology Revivals)* H. J. Eysenck, 2013-10-31 Originally published in 1960 the two volumes of Experiments in Personality report a number of experiments in psychogenetics psychopharmacology psychodiagnostics psychometrics and psychodynamics all of which formed part of the programme of research which had been developing from the late 1940s at the Maudsley Hospital Presenting the studies together in a book rather than the more usual route of journal articles was itself felt to be an experiment at the time especially given the wide area covered The decision was deliberate because all the studies reported formed part of a larger whole which would have been lost if published separately Volume II looks at psychodiagnostics psychodynamics and psychometrics **Basic Partial Differential Equations** David. Bleecker, 2018-01-18 Methods of solution for partial differential equations PDEs used in mathematics science and engineering are clarified in this self contained source The reader will learn how to use PDEs to predict system behaviour from an initial state of the system and from external influences and enhance the success of endeavours involving reasonably smooth predictable changes of measurable quantities This text enables the reader to not only find solutions of many PDEs but also to interpret and use these solutions It offers 6000 exercises ranging from routine to challenging The palatable motivated proofs enhance understanding and retention of the material Topics not usually found in books at this level include but examined in this text the application of linear and nonlinear first order PDEs to the evolution of population densities and to traffic shocks convergence of numerical solutions of PDEs and implementation on a computer convergence of Laplace series on spheres quantum mechanics of the hydrogen atom solving PDEs on manifolds The text requires some knowledge of calculus but none on differential equations or linear algebra **Applied Logistic Regression** David W. Hosmer, Jr., Stanley Lemeshow, 2004-10-28 From the reviews of the First Edition An interesting useful and well written book on logistic regression models Hosmer and Lemeshow have used very little mathematics have presented difficult concepts heuristically and through illustrative examples and have included references Choice Well written clearly organized

and comprehensive the authors carefully walk the reader through the estimation of interpretation of coefficients from a wide variety of logistic regression models their careful explication of the quantitative re expression of coefficients from these various models is excellent Contemporary Sociology An extremely well written book that will certainly prove an invaluable acquisition to the practicing statistician who finds other literature on analysis of discrete data hard to follow or heavily theoretical The Statistician In this revised and updated edition of their popular book David Hosmer and Stanley Lemeshow continue to provide an amazingly accessible introduction to the logistic regression model while incorporating advances of the last decade including a variety of software packages for the analysis of data sets Hosmer and Lemeshow extend the discussion from biostatistics and epidemiology to cutting edge applications in data mining and machine learning guiding readers step by step through the use of modeling techniques for dichotomous data in diverse fields Ample new topics and expanded discussions of existing material are accompanied by a wealth of real world examples with extensive data sets available over the Internet Manual Training Magazine Charles Alpheus Bennett, William Thomas Bawden, 1925
