Good Food Revolution :

The Good Food Revolution Will Allen, 2012-05-10 A pioneering urban farmer and MacArthur Genius Award winner points the way to building a new food system that can feed and heal broken communities The son of a sharecropper Will Allen had no intention of ever becoming a farmer himself But after years in professional basketball and as an executive for Kentucky Fried Chicken and Procter Gamble Allen cashed in his retirement fund for a two acre plot a half mile away from Milwaukee s largest public housing project The area was a food desert with only convenience stores and fast food restaurants to serve the needs of local residents In the face of financial challenges and daunting odds Allen built the country s preeminent urban farm a food and educational center that now produces enough vegetables and fish year round to feed thousands of people Employing young people from the neighboring housing project and community Growing Power has sought to prove that local food systems can help troubled youths dismantle racism create jobs bring urban and rural communities closer together and improve public health Today Allen s organization helps develop community food systems across the country An eco classic in the making *The Good Food Revolution* is the story of Will s personal journey the lives he has touched and a grassroots movement that is changing the way our nation eats

The Functional Foods Revolution Julian Mellentin, Michael Heasman, 2014-10-14 Foods that promote human health functional foods or nutraceuticals have caught the imagination of the global food industry All the household name companies are developing them as a key driver in their global strategies They see the prospect of new markets and bigger margins but the issues presented are fraught with complexity and difficulties Distinguishing hype from real hope the authors of this handbook explain the dilemmas and contradictions the industry faces They present a wealth of detailed marketing food policy and regulatory material from the leading markets world wide and show how the hopes of the industry and the consumer may be dashed The solution they offer is radical nothing less than a new business model of what they term a healthful company

Earl,2018-02-01 Schools and Food Education in the 21st Century examines how schools enact food policy and through doing so craft diverse foodscapes that create very different food experiences in schools The school food policy discourse is made up of an amalgamation of discourses on obesity prevention nutrition education welfarism and foodiness Whilst schools endeavor to enact policy in a variety of ways this book shows how foodiness is taken up and can only be taken up differently in different schools The book s unique contribution is to identify the discourse of foodiness and to show how this discourse whilst seemingly universal is actually situated in middle class ideas and is therefore more easily taken up by certain schools The book argues that the classed nature of foodiness leads to certain food knowledges becoming marginalized or lost and this then positions some schools in tension with their local communities resulting in widely variant food experiences for children Earl demonstrates how foodiness is taken up in schools by first exploring how the foodscape at school is shaped by policy and media sources The book then examines how foodiness is taken up by schools with different SES profiles by showing how food moves through the school day Asking critical questions on class and poverty that are often overlooked this book will be of interest to researchers academics and students working on food issues related to teaching food policy and schools in the fields of education sociology and food studies It should also be of interest to policymakers parents and teachers
