Bleeker,Johannes Geiss,M. Huber,2012-12-06 One of the most attractive features of the young discipline of Space Science is that many of the original pioneers and key players involved are still available to describe their field Hence at this point in history we are in a unique position to gain first hand insight into the field and its development To this end The Century of Space Science a scholarly authoritative reference book presents a chapter by chapter retrospective of space science as studied in the 20th century The level is academic and focuses on key discoveries how these were arrived at their scientific consequences and how these discoveries advanced the thoughts of the key players involved With over 90 world class contributors such as James Van Allen Cornelis de Jager Eugene Parker Reimar L st and Ernst Stuhlinger and with a Foreword by Lodewijk Woltjer past ESO Director General this book will be immensely useful to readers in the fields of space science astronomy and the history of science Both academic institutions and researchers will find that this major reference work makes an invaluable addition to their collection *Anticipation and the control of voluntary action* Dorit Wenke,Rico Fischer, A major hallmark in the adaptive control of voluntary action is the ability to anticipate short and long term future events Anticipation in its various forms is an important prerequisite for higher order cognitive abilities such as planning reasoning and the pursuit of both immediate goals and long term goals that may even stand in opposition to immediate

desires and needs e.g. to invest in pension funds. Therefore it is not surprising that diverse and rather independent research lines have evolved all somehow targeting various anticipatory capacities that are involved in the control of voluntary action and thus contribute to the uniqueness of human goal directed behavior. For example prediction of the incentive value of action outcomes drives goal directed instrumental behavior e.g. Dickinson, Rushworth, Prinz 1990. Furthermore the degree of match between intended, anticipated and actual action effects has been proposed to be a major determinant of motor programming and online action corrections Jeannerod 1981, motor learning e.g. Wolpert, Diedrichsen e.g. Abell, Happé, Nobre, Coull 2010 and to anticipate conflict e.g. Correa, Rao, Nobre 2009. Voluntary action is influenced by the anticipation and prediction of mental effort in task processing e.g. Song, Schwarz 2008. In addition the anticipation of long term future social consequences e.g. expected aloneness has been shown to affect cognitive mechanisms involved in logic and reasoning e.g. Baumeister, Twenge, Nuss 2002. Last but not least learning of statistical contingencies e.g. conflict frequency leads to the anticipation and prediction of context specific executive control requirements e.g. Crump, Gong, Milliken 2006, Dreisbach, Haider 2006. The aim of the present Research Topic is to provide a platform that offers the possibility of cross fertilization and enhanced visibility among to date rather segregated research lines.

Current Topics in Astrofundamental Physics: The Cosmic Microwave Background Norma G. Sánchez, 2012-12-06. This NATO Advanced Study Institute provided an updated understanding from a fundamental and deep point of view of the progress and current problems in the early universe, cosmic microwave background radiation, large scale structure, dark matter problem and the interplay between them. The focus was placed on the Cosmic Microwave Background Radiation. Emphasis was given to the mutual impact of fundamental physics and cosmology both at theoretical and experimental or observational levels within a deep and well defined programme and a global unifying view which in addition provides of careful interdisciplinarity. Special Lectures were devoted to neutrinos in astrophysics and high energy astrophysics. In addition each Course of this series introduced and promoted topics or subjects which although not being of purely astrophysical or cosmological nature were of relevant physical interest for astrophysics and cosmology. Deep understanding, clarification, synthesis, careful interdisciplinarity within a fundamental physics framework were the main goals of the course. Lectures ranged from a motivation and pedagogical introduction for students and participants not directly working in the field to the latest developments and most recent results. All Lectures were plenary, had the same duration and were followed by a discussion. The Course brought together experimentalists and theoretical physicists, astrophysicists and astronomers from a variety of backgrounds including young scientists at post doctoral level, senior scientists and advanced graduate students as well.

Remote Sensing of the European Seas Vittorio Barale, Martin Gade, 2008-03-15. Princess Enheduanna, daughter of King Sargon of Akkad, lived around 2300 BC. She was a high priestess of the moon god Nanna in the ancient city of Ur and an accomplished poet too. In fact she is the author of a number of Sumerian hymns and is generally considered to be the earliest author known by name. When she came

to honor Inanna the goddess of sexual love fertility and warfare daughter of Nanna and often associated with the planet Venus the one that the Akkadians called Ishtar above all the other gods of the Sumerian pantheon she mentioned for the very first time in her Hymn number 8 nothing less than the Seven Seas Septem Maria would call them the Romans centuries later after inhering the concept from the Greeks for whom seven probably just meant several but perhaps applying it to the wrong place i.e. the extensive system of coastal lagoons which at the time dotted the northern Adriatic Sea at least in the description of Pliny the Elder Roman fleet commander and scholarly author of *Historia Naturalis* Indeed which seven seas are intended depends on the context According to the historians there are at least nine bodies of water in the medieval European and Arabic literature that can aspire to qualify as one of the famous seven
