Transforming Tales argues that the study of transformation is crucial for understanding a wide range of canonical work in medieval French literature From the *lais* and Arthurian romances of the twelfth and thirteenth centuries through the *Roman de la Rose* and its widespread influence to the fourteenth century *Ovide moralis* and the vast prose cycles of the late Middle Ages metamorphosis is a recurrent theme resulting in some of the best known and most powerful literature of the era *Transforming Tales* is the first book in English to explore in detail the importance of ideas of metamorphosis in French literature from the twelfth to the fifteenth centuries This book s purpose is twofold it traces a series of figures the werewolf the snake woman the nymph the magician amongst others as they are transformed within individual texts and it also examines the way in which the stories of transformation themselves become rewritten during the course of the Middle Ages Griffin s approach combines close readings and comparisons of literary texts with readings informed by modern critical theories which are grounded in many of the ideas raised by medieval metamorphosis the body gender identity and categories of life Literary depictions and reworkings of transformation raise questions about medieval understandings of the differences
