Access edition of this book will be available on the Liverpool University Press website and the OAPEN library Since its
invention the automobile has been systematically consumed to become part of the fabric of twentieth and twenty first century
society its impact and perception making the car an accurate gauge of changing cultural norms and values As it grew in
popularity the automobile conditioned the very texture of modern life and the particularly car centred society of
contemporary France is an especially apt locus for examination The ubiquity of the automobile across all social strata
provides us with a defined lens through which to examine the evolution of French society in the modern and post modern
eras Taking the Second World War as a pivotal moment in recent French history this book demonstrates how the automobile
was both consumed and fetishized in distinct ways before and after this conflict The ways in which society evolved from the
pre to the post war period allow us to view French culture through the prism of the automobile as it embodied technological
and social progress in twentieth century France The present volume seeks to explore and interrogate the processes of
representation and mediation inherent in the evolving patterns of automobile consumption and their subsequent impacts on
local and national identity framed by a detailed case study centred on France from the late nineteenth century to the oil crisis

familiar figure of Bibendum and the promotional campaigns designed around him to analyze the cultural assumptions of belle

tourism in France and Europe through its famous Red Guide first introduced in 1900 noting that in the aftermath of World
War I the company sold tour guides to the battlefields of the Western Front and favourably positioned France s participation
in the war as purely defensive and unavoidable Throughout this period the company successfully identified the name of
Michelin with many aspects of French society from cuisine and local culture to nationalism and colonialism **Automobile**
