Engineering Drawing Napril 2013 Memo:

Protection of whistleblowers - Recommendation CM/Rec(2017)7 and explanatory memorandum Council of Europe, 2015-05-22 Recommendation CM Rec 2014 7 on the protection of whistleblowers encourages member states of the Council of Europe to have in place a normative institutional and judicial framework that protects the rights and interests of individuals who in the context of their workbased relationship report or disclose information on threats or harm to the public interest A series of principles is set out in the appendix to the recommendation to guide member states when introducing legislation and regulations or where required making amendments

The Persistent Objector Rule in International Law James A. Green, 2016-03-03 The persistent objector rule is said to provide states with an escape hatch from the otherwise universal binding force of customary international law It provides that if a state persistently objects to a newly emerging norm of customary international law during the formation of that norm then the objecting state is exempt from the norm once it crystallises into law The conceptual role of the rule may be interpreted as straightforward to preserve the fundamentalist positivist notion that any norm of international law can only bind a state that has consented to be bound by it In reality however numerous unanswered questions exist about the way that it works in practice Through focused analysis of state practice this monograph provides a detailed understanding of how the rule emerged and operates how it should be conceptualised and what its implications are for the binding nature of customary international law It argues that the persistent objector rule ultimately has an important role to play in the mixture of consent and consensus that underpins international law

Australia's Human Rights Scrutiny Regime Adam Fletcher, 2018-09-17 In 2010 the Australian Government decided that it would not propose a Human Rights Act despite the relevant recommendation of the 2008 09 National Human Rights Consultation Instead it introduced a Human Rights Framework comprising several measures to enhance human rights protection including the Human Rights Parliamentary Scrutiny Act 2011 The scrutiny regime under that Act was designed to ensure rights would be given due consideration before Commonwealth legislation was passed The Act created a unique bipartite dialogue system involving a formal interchange on rights compatibility between the executive and Parliament while excluding the courts This set the Commonwealth apart from jurisdictions such as the ACT Victoria New Zealand and the UK which have statutory rights instruments administered by their courts The book presents a detailed study of all aspects of the scrutiny regime and compares the regime with its closest counterparts overseas In assessing the regime's impact it argues that a system in which the executive and Parliament are responsible both for protecting rights and for remedying rights breaches is neither more legitimate nor more effective than one involving all three branches of government Accordingly it calls for strengthening reforms

Small and Medium-Sized Enterprises in International Economic Law Thilo Rensmann, 2017-06-09 International economic law with its traditional focus on large multinational enterprises is only slowly waking up to the new reality of small and medium sized enterprises SMEs entering the global marketplace In the wake of the

digital revolution smaller companies now play an important role in the global economic landscape In 2015 the UN expressly called for SMEs to have greater access to international trade and investment and it is increasingly recognized that the integration of SMEs provides one of the keys to creating a more sustainable and inclusive global economy As SMEs increasingly permeate transnational supply chains so interactions between these companies and international economic law and policy proliferate Small and Medium sized Enterprises in International Economic Law offers the first comprehensive analysis of the interaction between SMEs and international economic law This book presents a broad international perspective gathering together contributions by leading experts from academia legal practice and international organizations It opens up a field of enquiry into this so far unexplored dynamic and provide a touchstone for future debate The analysis covers a broad spectrum of international trade and investment law focusing on issues of particular interest to SMEs such as trade in services government procurement and trade facilitation Diverse perspectives illuminate regional developments in particular within the EU and the implications of mega regional free trade agreements The essays also examine questions of legitimacy of global economic governance in particular concerns surrounding the threat posed to the interests of domestic SMEs by the growing liberalization of international trade and investment These essays constitute essential reading for practitioners and academics seeking to navigate a previously neglected trend in international economic law
