

Hyper 2 In-line Regulator

Product Guide

The G4 O/D Hyper 2 In-line Regulator has been designed to meet the quickly changing demands of today's top players. The G4 Hyper 2 not only exceeds the requirements of every past gun on the market today. With extremely consistent regulated output pressures enough to handle high rates of airflow, the G4 Hyper 2 in-line will also deliver consistent velocity as well as shoot down due to inadequate air supply. The Hyper 2 In-Line has an easily featured range of air pressures, from 50psi to 400psi.

With the air inlet port located on a panel at the bottom of the regulator, the Hyper 2 in-line is easily installed onto almost every gun, with nearly any crate and air system configuration. The external pressure adjustment is easily accessed at the bottom of the regulator with a standard 3/16" allen wrench.

Installation and Adjustment

The Hyper 2 In-Line fits any standard M18 adapter. To install the Hyper 2 in-line, simply thread on the adapter and slide into the air inlet port on the side of the device body. Use a 3/16" allen wrench to tighten.

After carefully connecting your air hose from your bottle or air system to the Hyper 2 In-Line you will need to adjust the Hyper 2 reg to the recommended output pressure for your marker. The Hyper 2 in-line is set by the factory to approximately 175psi.

The output pressure of the Hyper 2 in-line is adjusted by turning the brass output housing. The brass housing screw is located on the side of the reg. A 3/16" allen wrench will be required for this operation. By turning the housing clockwise, you will increase the output pressure of the reg to the gun. Turning the housing counter clockwise, you will decrease the output pressure of the reg.

After each adjustment of the output pressure of the Hyper 2 in-line you will need to cycle your marker a few times. This will allow your marker and air system to stabilize if there are any existing problems. The Hyper 2 will have a lifespan period of about 2500 shots to be its best form to the point and reach its optimum performance.
