up The Green Building Bottom Line puts an entire development team at the table to better understand both the issues encountered and what's behind the perceived price premium for building green. This candid and transparent account explores every aspect of green development on groundbreaking projects from the nation's first all-retail LEED core and shell project to an innovative multitenanted LEED Existing Buildings office project to a mixed-use hotel-retail-condo project in a transitional urban market. The authors focus on such issues as values, culture, life cycle costs, insurance, financing, coordinating a team, marketing, and negotiating leases. Includes detailed case studies of green building projects start to finish. Information on financial, legal, and operational aspects of the job. The real-world costs of green building, not unrealistic estimates. A behind-the-scenes look at the LEED building process. Unique insight from those who have actually done the work. The Green Building Bottom Line covers:

- Economical and ecological benefits
- Auditing sustainability in existing buildings
- Financial benefits of green tenancy
- Loan analysis
- Insurance underwriting
- Expense reduction
- Writing a green lease
- Converting an existing building
- Green retail
