collection discusses phenomenological critiques of formalism and their relevance to the problem of responsibility and the life world The book deals with themes of formalization of knowledge in connection to the life world the natural world the history of science and our responsibility for both our epistemic claims and the world in which we live Readers will discover critiques of formalization the life world and responsibility and a collation and comparison of Pato ka s and Husserl s work on these themes Considerable literature on Husserl is presented here and the two themes of epistemic responsibility and the life world are discussed together This work specifically emphasizes the interrelatedness of these existential aspects of his work self responsibility and the crisis as not only epistemological but also related to human life This volume also introduces Jan Pato ka to English speaking readers as a phenomenologist in his own right Pato ka shows us in particular the significance of the modern abyss between our thinking and the world Readers will discover that this abyss is of concern for our everyday experience because it leads to a rupture in our understanding of the world between the world of our living and its scientific construct We see that Pato ka continually emphasized the relevance of Husserl s work to existential questions relating to human responsibility and the life world which he admits is left largely implicit in Husserl s work This edited collection will spark discussion on the question of responsibility against the backdrop of formalized knowledge which is increasingly inaccessible to human understanding Despite the complexity of some of the analyzed ideas this book discusses these themes in a clear and readable way This work is scholarly exact in its discussion and authoritative in its reading but at the same time accessible to anyone motivated to understand these debates *Bulletin* University of Colorado Boulder,1923
