Congratulations on your purchase of the HobbyZone® Mini Super Cub RLE electric airplane. Your Mini Super Cub comes complete with everything you need, all in one box, to get you in the air and flying.

A DVD is also included to give you some helpful hints before you take to the sky. Your Mini Super Cub uses advanced Anti-Crash Technology (ACT) that allows you to safely trim with a fully proportional 3-channel aileron and rudder system. The Mini Super Cub has built-in sensors that look for the sky and horizon, and thanks to the specially programmed software, it can temporarily "take over" in the event that your aircraft is put in danger from incorrect transmitter input. This will help to prevent a crash and keep you in the air.

Welcome to the World of

# hobbyzone®

Once you are more experienced and no longer need the training software, you can simply turn off the ACT with the push of a button. When this is done, you will have full control at all times, allowing you to perform exciting maneuvers such as loops and spins.

Please read this instruction manual thoroughly and watch the DVD prior to flying for the first time. This will greatly add to your flight experience and help to ensure success on your first flight.

Crash damage is not covered under the warranty.

Be sure to read the warranty on page 21 and "Warranty and Safety" on page 23 before you proceed to Step 1.

Please register your Mini Super Cub online at [www.hobbyzone.com](http://www.hobbyzone.com).

Step 1

### Charging the Aircraft Battery

Your Mini Super Cub comes with a 12V DC balancing charger and a 2S Li-Po battery pack. You must charge the included Li-Po battery pack with a Li-Po specific charger only (such as the included charger). **Never leave the battery and charger unattended during the charge process.** Failure to follow the instructions properly could result in a fire. When charging, make certain the battery is on a heat-resistant surface.

**Charging the Aircraft Battery:**  
 The 12V DC 2S Li-Po balancing charger provides a charge current of 2A (2000mA). The typical charge time for the included 7.4V 2000mAh Li-Po is approximately 40 minutes to 1 hour.

1. Plug in the battery, the LED will blink indicating it is charging.

2. The LED on the charger will begin to blink and will turn to solid red when charging is complete.

**Note:** In some recent versions, the vehicle must be running for the 12V accessory outlet to be operational. It is not recommended to charge the battery pack while the vehicle is in motion. You may wish to purchase a 12V adapter board which will allow you to connect your charger directly to the vehicle's battery for charging at low load (and engine idling).
