The grass and flowers

What are the two primary consumers in this food web?

Grasshopper and bunny

Which animals are secondary consumers?

Bird, snake, and fox

Which animal does not have a predator? What is that kind of animal called?

The owl does not have a natural predator. It is an apex predator.

What would happen if the bunny population suddenly disappeared?

The grass might start to grow out of control. The fox, snake, and owl would have to go with less food. Their populations might start to decrease as a result.

What would happen if the owls went extinct?

More foxes, bunnies, and snakes would live. That might put a stress on other resources. For example, so many bird might be eaten by the snakes that the grasshopper population might starts to boom.
