Materials

Index

Procedure

Obtain the phenotypic characteristics and the corresponding gene genotypes for the traits listed below:

- In the first row of the table 1, list the 27 characteristics below. Then check each trait the dominant phenotype and the recessive phenotype. Use the examples in the table for correct labeling.
- In the corresponding row of table 2, write your phenotypes and determine its dominance or recessive.
- In the third column of table 2, write your possible genotype for each genotype.

Observations

- If you show the recessive trait, then you must be homozygous recessive.
- If you show dominant trait, you may be heterozygous/dominant or homozygous for that trait.
 - If one of your parents shows the recessive trait, then you must have passed on a gene for the recessive trait, and you must be heterozygous for that trait.
 - If neither of your parents shows the recessive trait, you may not know if you are heterozygous or homozygous dominant for that trait. In that case, you **may** possible genotypes (heterozygous and homozygous dominant).

*** If you need help, you may ask your parents about their traits. * DO NOT TALK TO OTHER LAB

GROUPS. ** If your parents get confused about dominant/recessive genes, please give **them** possible genotypes for dominant/recessive gene.
