Money Run English Edition:

Ownership Economics Gunnar Heinsohn, Otto Steiger, 2013 This book presents the first full length explanation in English of Heinsohn and Steiger's groundbreaking theory of money and interest which emphasizes the role played by private property rights Ownership economics gives an alternative explanation of money and interest proposing that operations enabled by property lead to interest and money rather than exchange of goods Like any other approach it has to answer economic theory's core question what is the loss that has to be compensated by interest Ownership economics accepts neither a temporary loss of goods as in neoclassical economics nor Keynes's temporary loss of already existing exogenous money as the cause of interest Rather money is created as a non physical title to property in a credit contract secured by a debtor's collateral and the creditor's net worth This book is an edited English translation of a highly successful German text and offers the first book length treatment of a theory which has received much interest since its first appearance in articles in the late 1970s

Sunspots and Non-Linear Dynamics Kazuo Nishimura, Alain Venditti, Nicholas C. Yannelis, 2016-12-03 This book presents the state of the art in non linear dynamics and sunspots These two topics have been the core of an international conference on instability and public policies in a globalized world organized at Aix Marseille School of Economics and GREQAM in honor of Jean Michel Grandmont He has made significant contributions on general equilibrium theory monetary theory learning aggregation non linear dynamics and sunspots This book assembles contributions by Jean Michel Grandmont's colleagues students and friends that have been influenced by his works and that are at the frontier of research in this domain today
