Technology-Based Pilot Programs National Research Council,Division on Engineering and Physical Sciences,Commission on Engineering and Technical Systems,Committee on Reserve Forces for 2010 and Beyond,1999-09-01 As the twenty first century approaches the number of full time active duty personnel in the U S military excluding the Reserves and National Guard is about 1 4 million the lowest level since before World War II Nevertheless the U S military is supposed to be prepared to fight two major theater wars almost simultaneously while conducting peacekeeping operations and other assignments around the globe To fulfill this wide range of missions the U S military must continue to rely on the Reserves

and National Guard which are known collectively as the reserve components The current number of reserve components is almost equal to the number of active duty personnel In the case of the U S Army the number of reserves is double the number of active personnel This study addresses how technology can be used to improve the readiness and effectiveness of the reserve components and their integration with the active components Many technologies are expected to enhance the capabilities of the U S military in the twenty first century including precision weapons high fidelity sensors long range surveillance enhanced stealth characteristics and advanced communications and information systems This study reaffirms the importance of improved communication and information systems for improving comprehensive training and accelerating the mobilization of reserve components for military missions in the coming decade Although programs using these technologies are already under way in both the reserve and active components of the military this study focuses on the effectiveness of reserve components and active reserve integration

Escaping Exodus: Symbiosis Nicky Drayden,2021-02-23 The Compton Crook Award winning author weaves her trademark blend of science fiction and dark humor in this dazzling story that continues the imaginative saga begun in *Escaping Exodus* in which a society lives in the belly of a beast and an entire civilization s survival depends on a pair of uneasy allies who must come together for one epic battle Nearly a thousand years removed from Earth the remnants of humanity cling to existence inside giant space faring creatures known as the Zenzee Abused and exploited by humans for generations these majestic animals nearly went extinct but under the command of its newly minted ruler Doka Kaleigh life in the Parados I has flourished Thanks to careful oversight and sacrifice by all of its crew they are now on the brink of utopia and yet Doka s rivals feel threatened by that success The Senate allowed Doka to lead their people believing he d fail spectacularly a disaster that would cement the legitimacy of their long standing matriarchy Despite vocal opposition and blatant attacks on his authority Doka has continued to handle his position with grace and intelligence he knows a single misstep means disaster When a cataclysmic event on another Zenzee world forces Doka and his people to accept thousands of refugees a culture clash erupts revealing secrets from the past that could endanger their future For Doka the stakes are bigger and more personal than ever before and could cost him his reign and his heart He has fallen for the one woman he is forbidden to love his wife Seske Doka and Seske must work closely together to sway the other Zenzee worlds to stop their cycles of destruction But when they stumble upon a discovery that can transform their

world they know they must prepare to fight a battle where there can be no winners only survivors Collier's ,1944
