## **English Syntax Tree Diagrams:**

**Sentence Generation** Yuko Sakai, 2017-04-27 Many define the language in various phrases with various modifiers as a tool of communication. However, not all the language is communicated and the language is generated before the communication. We have no words to communicate without thinking whose concrete act is to choose the words. Therefore, cognition and language have the same origin. We, the human beings, have language to recognize and dominate the world including our own mind. This is the reason why we have reason and language. Language is not merely a tool of communication but it is indispensable to have reason and to be a Homo sapiens. The reason is based on the outside world composed of space-time. We perceive the outside world and recognize it by naming or classifying in our each vocabulary. Accordingly, a linguistic theory which explains how and why the sentences are should start with the cognition. The method is opposite to that of Aristotle's tradition which begins in the form and the contents are interpreted from the form based on the view that language is a tool of communication regarding only the communicated words as language. The same view is also found in F. de Saussure who regarded language as a given and socially approved system of signs. Language is not a system of signs but what we generate just in the next moment. If we shut up language does not exist. The system or grammar may change with our usage of words moment by moment thus language continues to change as long as it is spoken. Consequently, this work finds the DEEP and UNIVERSAL STRUCTURE of sentence in the structure of the four-dimensional cognition. First, we deduce what structure is necessary to express the four-dimensional cognition. Secondly, we see how we generate the surface structures in five languages: English, Spanish, Chinese, Japanese, and Ainu. We define each word in syntactic tree diagrams just like chemical formulas to verify the deep structure in the surface structure.

**English Syntax Tree Diagram** Yuko Sakai, 2017-06-21 In this work we try to verify that English sentences are restricted and limited by the space-time structure of cognition which may be the universal sentence structure while a sentence expresses a thought or cognition. We see the reason why sentences vary in English explaining each sentence in a syntax tree diagram which is not based on form but on contents logically in sentence generation.

English Syntax, second edition C. L. Baker, 1995-03-27 An authoritative self-contained introduction to the subject for students who have had no prior coursework in syntactic theory. English Syntax is an authoritative self-contained introduction to the subject for students who have had no prior coursework in syntactic theory. The detailed revisions throughout this new edition are aimed at increasing its clarity and usefulness. There are changes in almost every chapter including a large number of new exercises and several new subsections. In addition, there are two new appendices: the first sketching the relation of English syntax to the wider field of generative syntactic theory, the second summarizing the basic syntactic structures discussed in the body of the text. Specific changes include a fuller discussion at the beginning of chapter 3 of the difference between complements and modifiers, a more systematic introduction to tree diagrams and what they express, at the end of chapter 3 a new subsection in chapter 4 on how to analyze complex structures, a new discussion of

the general nature of missing phrase constructions in chapter 9 a significant revision of the discussion of comparative clauses in chapter 12 a new discussion of the scope of negation in chapter 15 and in chapter 16 a new discussion of practical strategies for analyzing conjoined structures

William Darrach Halsey, 1986 **Infinite Syntax** John Robert Ross, 1986 Originally presented as the author's thesis Ph D Massachusetts Institute of Technology 1979 under the title Constraints on variables in syntax

**Chinese Syntax Tree Diagram** Yuko Sakai, 2019-08-07 Some people say that Chinese does not have grammar as a Chinese word may be a noun a verb an adjective or an adverb in many cases without conjugation inflection derivation nor even the preposition However Chinese syntax has many similarities with English as an isolating language whose word order is more obligatory than inflected or agglutinative languages Moreover because of the ideograph which expresses a morpheme indifferent of the parts of speech the word order is stricter than English Chinese words are fundamentally monosyllabic the same as English original words such as head arm go come Being monosyllabic the verb may combine easily and even a short sentence may be more complex than in English In this work we try to verify the hypothesis that though the grammar varies every human language is based on the universal sentence structure restricted by the space time cognition
