

ENPC 4TH EDITION: PRACTICE TEST WITH GUARANTEED ACCURATE ANSWERS

1. A preschooler has a small laceration that requires 2 stitches. The nurse covers the wound with a bandage knowing that it will comfort the child to have it covered. What is the developmental reason for this intervention?

- A.) Preschoolers are magical thinkers and imagine bandages keep their insides from coming out.
- B.) Preschoolers fear physical disability and believe a bandage will prevent disability.
- C.) Preschoolers explore orally and will likely chew or suck on the stitches if left uncovered.
- D.) Preschoolers are concerned with body image and don't want to appear different than peers. - correct answer ✓ ✓ A.) Preschoolers are magical thinkers and imagine bandages keep their insides from coming out.

Rationale: Preschoolers are magical and illogical thinkers and have difficulty distinguishing fantasy from reality. They have misconceptions about illness, injury, and bodily functions. For example, they perceive that if their skin is cut, they fear their insides will leak out. Covering a wound with a bandage helps them with this fear.

2. 7-month-old presents to the emergency department with a complaint of fever. Assessment reveals a patent airway and slight cyanosis around his lips and nail beds. He is alert and interactive. His vital signs are 38.5 C (101.3F), HR 134, RR 32, BP 78/54 mm Hg, and Spo2 84%. The nurse notes a healed surgical scar on his chest. Based on this assessment, what is the nurse's priority?

- A.) Administer ibuprofen to treat the fever.
- B.) Begin oxygen via a nonrebreather mask.
- C.) Obtain a surgical history.
- D.) Ask if the Spo2 is normal for him. - correct answer ✓ ✓ D.) Ask if the Spo2 is normal for him.

Rationale: Children with special healthcare needs may present differently than other children, but these differences may be normal. The surgical scar on the chest is likely from a congenital heart defect repair. The mother's chief complaint is the fever, not the color, pulse oximetry, or the respiratory distress. This may be because these aspects of his assessment are normal. The intact mental status is also a sign that

Tobacco and Health K. Slama, 2012-12-06 Over 1 100 delegates from a hundred countries attended the 9th World Conference on Tobacco and Health After five days of debate several important resolutions were adopted unanimously and will be landmarks in the fight against tobacco This great success is due to three facts which emerged from the discussions 1 It appears clearly now that the risks associated with tobacco are much greater than previously assumed Out of two regular smokers one will die from a tobacco related disease 2 Reducing tobacco consumption can be achieved but the data collected in several countries show that it requires a global strategy This strategy was much debated during the conference

The resolutions adopted emphasize the agreement of the delegates on the main points. Action to fight the growing epidemic of tobacco attributable disease and death involves convincing the general public, the medical community and decision makers of the need to act for tobacco control. The most efficient tools for helping individuals never to start or successfully to stop using tobacco should be developed. Effective tobacco control endeavors are required to counteract the actions of the powerful and influential tobacco manufacturers. With the help and under the aegis of WHO, DICC, IUATLD, ISFC, IOCD and IUHPE, an international alliance for health and against tobacco should unite all those who are engaged in this fight.

ON THE ARCHITECTURE OF WORDS. APPLICATIONS OF MEANING STUDIES GODED RAMBAUD Margarita, IBÁÑEZ MORENO Ana, HOSTE Veronique, MATTENS Sil, DE CONINCK Peter, 2015-05-27. In light of today's extensive use of digital communication, this volume focuses on how to understand and manage the various types of linguistically based products that facilitate the use and extraction of information. Including conceptual and terminological databases, digital dictionaries, thesauri, language corpora and ontologies, they all contribute to the development and improvement of language industries such as those devoted to automatic translation, knowledge management, knowledge retrieval, linguistic data analysis and so on. As the theoretical background underlying these applications is outlined in detail in the earlier chapters of the book, the reader is able to establish the necessary links between the various but related kinds of linguistic and in particular semantic applications. A general review of several theories and linguistic models that influence the practical application of Meaning studies to the new technologies is also included. This book is aimed at students and researchers of Linguistics as well as those with a basic knowledge of Linguistics and Semantics who are interested in the ongoing development of the handling of meaning and its practical usage.

Election Day Emilee Booth Chapman, 2024-08-20 An original defense of the unique value of voting in a democracy Voting is only one of the many ways that citizens can participate in public decision making so why does it occupy such a central place in the democratic imagination In Election Day political theorist Emilee Booth Chapman provides an original answer to that question showing precisely what is so special about how we vote in today s democracies By presenting a holistic account of popular voting practices and where they fit into complex democratic systems she defends popular attitudes toward voting against radical critics and offers much needed guidance for voting reform Elections embody a distinctive constellation of democratic values and perform essential functions in democratic communities Election day dramatizes the nature of democracy as a collective and individual undertaking makes equal citizenship and individual dignity concrete and transparent and socializes citizens into their roles as equal political agents Chapman shows that fully realizing these ends depends not only on the widespread opportunity to vote but also on consistently high levels of actual turnout and that citizens experiences of voting matters as much as the formal properties of a voting system And these insights are also essential for crafting and evaluating electoral reform proposals By rethinking what citizens experience when they go to the polls Election Day recovers the full value of democratic voting today
