

Algebra 2B - Activity 10.2

1. Based on the grid below, identify each function below as being a polynomial, rational, or trigonometric function.

2. Identify each of the functions below that are **not** algebraic. These are the ones that are **not** polynomials, rational, or trigonometric. **Hint:** Use the grid below to look at the function's behavior as x approaches $\pm\infty$.

This is being repeated after the end of the same section.

3. Graph each of the functions part 2 on the grid below using the grid you have available. If you think a function is not algebraic, then graph it on the grid.

Warning: The functions that are **not** algebraic will appear to have a local maximum or minimum, but as x approaches $\pm\infty$, the function will behave like a degree 3 polynomial.
