Choosing Web 2.0 Tools for Learning and Teaching in a Digital World Pam Berger, Sally Trexler, 2010-04-09

Choosing Web 2.0 Tools for Learning and Teaching in a Digital World provides practical strategies and examples to effectively integrate Web 2.0 tools to support the inquiry process in the school library program and the classroom curriculum. Targeted for school librarians, this book addresses the questions: What is digital literacy? How is learning different in a digital world? And the most important questions: what are the best strategies, resources, and tools to support effective teaching and learning in a digital environment. The first two chapters of the book provide the important context for school librarians: research on student learning behaviors in a digital environment, Web 2.0 background and characteristics, and alignment with the new AASL Standards for the Twenty-first Century Learner and the Stripling Inquiry Process, Grades 4-12.

Competency-based Language Teaching in Higher Education María Luisa Pérez Cañado, 2012-11-28. Spanning the divide between the theory and praxis of competency-based teaching in tertiary language education, this volume contains invaluable practical guidance for the post-secondary sector on how to approach teaching and assess competencies in Bologna-adapted systems of study. It presents the latest results of prominent European research projects, programs of pedagogical innovation, and thematically linked academic networks. Responding to a profound need for a volume addressing the practical aspects of the newly designed language degrees now being rolled out across Europe, this essential contribution pools the insights of a prestigious set of scholars, practitioners, and policy makers from diverse parts of Europe and the US. It will inform crucial decisions about instituting and evaluating competencies in a new generation of language studies programmes.
