

Chapter 5 Properties And Attributes Of Triangles Test Answers

When people search for the best answer sheet, they usually forget the steps that led to the final solution. This book not only gives the correct answer but also shows the steps that led to the final solution. It is a great way to learn the correct answer and to understand the reasoning behind it.

The following are the main properties of triangles and their attributes. The first property is that the sum of the interior angles of a triangle is 180 degrees. The second property is that the sum of the exterior angles of a triangle is 360 degrees. The third property is that the area of a triangle is half the product of its base and height. The fourth property is that the perimeter of a triangle is the sum of its three sides. The fifth property is that the longest side of a triangle is opposite the largest angle. The sixth property is that the shortest side of a triangle is opposite the smallest angle. The seventh property is that the median of a triangle divides it into two right-angled triangles. The eighth property is that the altitude of a triangle divides it into two right-angled triangles. The ninth property is that the angle bisector of a triangle divides the opposite side into two segments that are proportional to the adjacent sides. The tenth property is that the perpendicular bisector of a side of a triangle passes through the other two vertices.
