1. When you first open the simulation, one bunny will be shown on your screen. The simulation allows you to control types of mutations that occur in the bunnies. Look for the area that says "add mutations."

What mutations can you add to your bunny?

fur, ears, teeth

2. There are three environmental factors listed that can also be changed. What are they?

wolves, tough food, limited food

Click "add a mate." What happens?

The bunnies overpopulate

Click on the **RESET** button and you will get another bunny and the screen will return to its original. 

3. In the top right corner of the screen is a sun and a snowflake. What happens when you click on the snowflake?

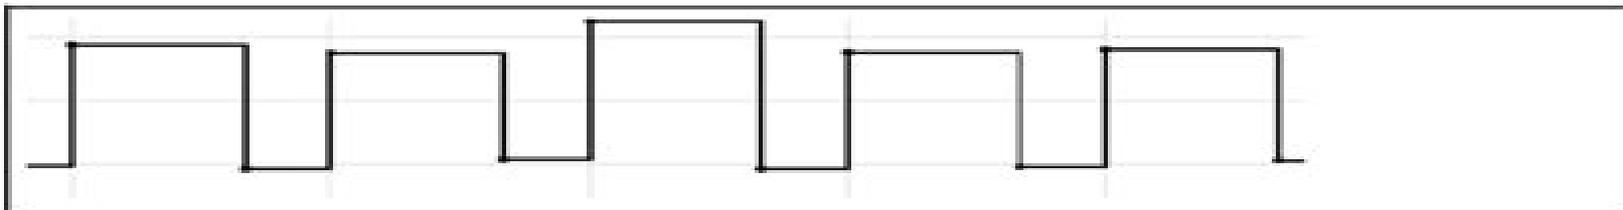

The background changes to white

4. In nature, populations don't get out of control because there are limiting factors in the environment. Start your simulation over and click "limited food," and then "add a mate." Run the simulation for 12 generations. Click "zoom out" on the graph to see the bunny numbers.

Describe what happens to the bunnies when food is limited.

Bunny numbers go up and then down in a cycle

Sketch the graph shown of the bunnies for 8-10 generations. (You can pause the simulation.)
