in aesthetics beyond the arts has encouraged the rapid growth of environmental aesthetics. Within this literature however less attention has been given to the spaces and places that emerge from various nature culture interactions. This has meant the relative neglect of types of environments to which the majority of people have access and interact with in a sustained manner. In this respect these are the environments in which many of us understand and value nature. Through a greater understanding of how humans interact with these environments and the types of relationships that emerge through this interaction we address seek to address this gap. *Between Nature and Culture* provides a systematic philosophical account of the main issues and problems that pertain to the aesthetics of modified environments as well as new insights concerning the generation and appreciation of landscapes and environments that fall between non human nature and human culture including gardens agricultural and ecologically restored landscapes and land and ecological art works.
