

Lesson-1

WORK, ENERGY AND POWER

WORK:

If a constant force F displaces a body through displacement s then the work done, W , is given by

$$W = F \cos \theta \cdot s = F \cdot s$$

Where s is magnitude of displacement and θ is angle between force and displacement

S.I. unit of work is Joule or Newton-metre.

If the work is done by a variable force F which displaces body from position A to B, having respective position-vectors r_1 and r_2 , the work W_{AB} is given by

$$W_{AB} = \int_{r_1}^{r_2} F \cdot dr = \text{Area under the curve } F \text{ vs graph.}$$

where dr is a small displacement of the body between A and B.

Work is a scalar quantity. If a number of forces are acting, the total work on the body is equal to the sum of the work done by all the forces.

SIGN CONVENTION OF WORK:

When $\theta = 0^\circ$ or 90°

$$W = F \cos \theta \text{ is positive}$$

i.e., when the force supports the motion of the body, work done by that force is said to be positive

But when $\frac{\pi}{2} < \theta < \pi$

$$W = F \cos \theta = -ve$$

i.e., in this case force opposes the motion of the body and so work done by that force is said to be negative.

Electro Technology Question Paper 23:

Electronic Technology, 1927 *Electrotechnology Practice* Jeffery Hampson, Steven Hanssen, 2019-06-07

Electrotechnology Practice is a practical text that accompanies Hampson Hanssen's theoretical Electrical Trade Principles. It covers essential units of competencies in the two key qualifications in the UEE Electrotechnology Training Package Certificate II in Electrotechnology Career Start Certificate III in Electrotechnology Electrician. Aligned with the latest Australian and New Zealand standards, the text references the Wiring Rules AS/NZS 3000:2018 and follows the uniform structure and system of delivery as recommended by the nationally accredited vocational education and training authorities. More than 1000 illustrations convey to the learner various concepts and real-world aspects of electrical practices; a range of fully worked examples and review questions support student learning, while assessment-style worksheets support the volume of assessment. Electrotechnology Practice has strong coverage of the electives for Cert II and Cert III, preparing students to be eligible to sit for the Capstone Assessment or the Licensed Electrician's Assessment (LEA) as a mandatory requirement to earn an Electrician's Licence. Premium online teaching and learning tools are available on the MindTap platform.

The Effects of Electronic Recordkeeping on the Historical Record of the U.S. Government National Academy of Public Administration, 1989 Examines the influence of electronic technology on recordkeeping practices in the federal workplace and to determine how these practices were affecting the retention or loss of electronic records *Dimensions of Evidence in European Civil Procedure* Vesna Rijavec, Tomaž Keresteš, 2015-12-29 Greater efficiency in civil dispute resolution is very much dependent on organized but fair fact-finding. Under European law, however, no clear-cut categorisation of means of evidence exists as yet, and significantly diverging interpretations persist of what is considered evidence in the sense of the foundational Council Regulation (EC) No 1206/2001 (EER). The EER fails to provide comprehensive rules for many other aspects of evidence taking, pointing instead to national legislation for solutions. As long as evidentiary rules remain different from country to country, there is an inherent risk of conflict of laws between different systems in the course of cooperation between courts in cross-border matters, leading to mistrust amongst judiciary and other participants in the proceedings. Focusing on national rules and using a comparative method which takes into consideration legal experiences from all legal circles in the EU, this book explains and analyses how the law of evidence works in Europe today. The authors draw on the vast base of relevant information collected in twenty-seven Member States by national reporters. Following the classical enumeration of types of evidence (production of documents, examination of witnesses, expert evidence, inspection by the judge, and examination of the parties), chapters encompass such issues and topics as the following: judicial cooperation in cross-

border cases general principles in evidence taking the right to be heard oral vs written form directness of evidence burden of proof judges case management powers regarding evidence means of evidence extent of influence of traditional principles and evidentiary rules on electronic evidence application of communication technology in cross border proceedings legal costs language inadmissible evidence and instances in which a court can refuse a request for evidence The authors offer well grounded recommendations on requested judge s entitlements direct and convenient communication cost issues revised provisions concerning language obstacles unification of presumptions and much more Armed with the wide ranging knowledge presented here practitioners handling civil cases anywhere in Europe will derive great practical benefit from this book As a masterful synthesis of how evidence is used in national courts in EU Member States and of how that use is changing the book will be greatly valued as a unique resource by legal scholars and academics With featured recommendations it can contribute to the development of mutual trust among the national courts inside the EU as well as trust among policymakers and national courts
