The future of dialects Marie-Hélène Côté, Remco Knooihuizen, John Nerbonne, 2016-02-05 Traditional dialects have been encroached upon by the increasing mobility of their speakers and by the onslaught of national languages in education and mass media Typically older dialects are leveling to become more like national languages This is regrettable when the last articulate traces of a culture are lost but it also promotes a complex dynamics of interaction as speakers shift from dialect to standard and to intermediate compromises between the two in their forms of speech Varieties of speech thus live on in modern communities where they still function to mark provenance but increasingly cultural and social provenance as opposed to pure geography They arise at times from the need to function throughout the different groups in society but they also may have roots in immigrants speech and just as certainly from the ineluctable dynamics of groups wishing to express their identity to themselves and to the world The future of dialects is a selection of the papers presented at Methods in Dialectology XV held in Groningen the Netherlands 11-15 August 2014 While the focus is on methodology the volume also includes specialized studies on varieties of Catalan Breton Croatian Belgian Dutch English in the US the UK and in Japan German including Swiss German Italian including Tyrolean Italian Japanese and Spanish as well as on heritage languages in Canada

Posthumous Images Chad Elias, 2018-09-07 For almost two decades of its history 1975-90 Lebanon was besieged by sectarian fighting foreign invasions and complicated proxy wars In Posthumous Images Chad Elias analyzes a generation of contemporary artists who have sought in different ways to interrogate the contested memory of those years of civil strife and political upheaval In their films photography architectural projects and multimedia performances these artists appropriate existing images to challenge divisive and violent political discourses They also create new images that make visible individuals and communities that have

been effectively silenced rendered invisible or denied political representation As Elias demonstrates these practices serve to productively unsettle the distinctions between past and present the dead and the living official history and popular memory In Lebanon the field of contemporary art is shown to be critical to remembering the past and reimagining the future in a nation haunted by a violent and unresolved war *The War Lawyers* Craig Jones,2020-11-26 Over the last 20 years the world s most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers The War Lawyers examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza Drawing on interviews with military lawyers and others this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft drones and or ground forces and with what results This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence
