Psychoanalytic Perspectives on Fundamentalism, Radicalisation and Terrorism Jessica Yakeley, Paul Cundy, 2020-06-04 Terrorism is no longer woven into the backdrop of our daily lives but rather it has been pushed to centre stage an ongoing tragedy in which comprehension of the perpetrators motivations is eclipsed by the impact of horror and devastation on its victims and wider society Attempting to make sense of these atrocities and their antecedents a body of literature has accumulated since 9 11 which offers a psychoanalytic perspective on terrorism This research provides a reflective space within which the unconscious motivations primitive conflicts fantasies and impulses that underpin the extreme mindsets and violent actions of the individuals and groups involved may be explored offering insights complementary to those of different disciplines sociological political cultural and other This book brings together contemporary psychoanalytic writers and practitioners involved in the study of radicalisation fundamentalism and terrorism Some of the authors have worked with terrorists thus grounding their reflections and insights in direct clinical contact with these individuals Understanding the motivations of the perpetrators includes elucidation of the wider group dynamics of minority populations where the perpetuation of violence that is seen as terrorism may be viewed by its perpetrators as a justifiable response to collective experiences of subjugation humiliation and injustice suffered over generations Understanding such perspectives is not colluding with the aggressors but rather it may contribute to interventions at both individual and global levels that attempt to break the deadly cycle of violence This book was originally published as two special issues of *Psychoanalytic Psychotherapy*

Handbook of Disability Sport and Exercise Psychology Jeffrey J. Martin, 2018 Historically very few sport and exercise

psychologists and professionals from related fields such as disability and rehabilitation have conducted thorough research on individuals with disabilities engaged in sport and exercise. The tide is turning however as growing media attention and familiarity with the Paralympics and the Wounded Warrior Project begins capturing the attention of researchers everywhere. By addressing this gap, Jeffrey J. Martin's compelling *Handbook of Disability Sport and Exercise Psychology* is one of the first comprehensive overviews of this important and emerging field of study. In this volume, Martin, an accomplished professor of sport and exercise psychology, shines a light on a variety of topics ranging from philosophy, athletic identity, participation, motivation, quality of life, social and environmental barriers, body image, and intellectual impairments among many other issues. Based on the author's own experience and insight, a majority of these topic discussions in this volume are accompanied by thoughtful directions for future research and exploration. Designed to spark conversation and initiate new avenues of research, the *Handbook of Disability Sport and Exercise Psychology* will allow for readers to look outside the traditional literature focusing largely on able-bodied individuals and instead develop a much greater perspective on sport and exercise psychology today.

Handbook of Biofuels Sanjay Sahay, 2021-10-31. *Handbook of Biofuels* looks at the many new developments in various types of bioenergy along with the significant constraints in their production and/or applications. Beyond introducing current approaches and possible future directions of research, this title covers sources and processing of raw materials to downstream processing constraints involved and research approaches to address and overcome these needs. Different combinations of products from the biorefinery are included along with the material to answer questions surrounding the optimum process conditions for conversion of different feedstocks to bioenergy, the basis for choosing conversion technology, and what bioenergy products make economic sense. With chapters on the techno-economic analysis of biofuel production and concepts and step-by-step approaches in bioenergy processing, the objective of this book is to present a comprehensive and all-encompassing reference about bioenergy to students, teachers, researchers, and professionals. Reviews all existing and emerging technologies surrounding the production of advanced biofuels including biodiesel and bioethanol. Includes biofuel applications with compatible global application case studies. Offers new pathways for converting biomass.
