Hierarchy Of Engineering Disciplines:

Philosophy and Engineering: An Emerging Agenda Ibo van de Poel, David E. Goldberg, 2010-03-11 Whereas science technology and medicine have all called forth dedicated philosophical investigations a fourth major contributor to the technoscientific world in which we all live that is engineering has been accorded almost none of the philosophical attention it deserves This volume thus offers a first characterisation of this important new field by some of the primary philosophers and ethicists interested in engineering and leading engineers interested in philosophical reflections The volume deals with such questions as What is engineering In what respect does engineering differ from science What ethical problems does engineering raise By what ethical principles are engineers guided How do engineers themselves conceive of their profession What do they see as the main philosophical challenges confronting them in the 21st century The authors respond to these and other questions from philosophical and engineering view points and so illustrate how together they can meet the challenges and realize the opportunities present in the necessary encounters between philosophy and engineering encounters that are ever more important in an increasingly engineered world and its problematic futures *A Discipline Independent Framework for Engineering Design* Reid Alan Baldwin, 1994 *Systems Analysis and Design: People, Processes, and Projects* Keng Siau, Roger Chiang, Bill C.
