High Impact Set C Fiction Witness:

We Shall Bear Witness Meg Jensen, Margaretta Jolly, 2014-08-26 An international array of human rights advocates scholars and survivor writers examine the profound and complex impact of personal testimony about human rights abuses as expressed through autobiography documentary film report oral history blog and verbatim theater *Witnesses to the Struggle* Anne Loftis, 1998-05 A study of the artistic and literary responses to the Depression era labor crises of the Golden State Anne Loftis focuses on the work and activities of John Steinbeck Carey McWilliams Paul Taylor and Dorothea Lange who brought the story of California's labor struggles to the rest of the country The realism and documentary expression of their art grew out of their personal involvement in the problems of society and Loftis explores the lasting influence of their work One of Steinbeck's unintended legacies was his treatment of California farm workers as victims the simple pawns of larger forces In her balanced and intriguing study Loftis reveals that the workers were not victims but rather the strong and resourceful creators of their own histories *Commemorating Writers in Nineteenth-Century Europe* J. Leerssen, A. Rigney, 2014-08-12 This volume offers detailed accounts of the cults of individual writers and a comparative perspective on the spread of centenary fever across Europe It offers a fascinating insight into the interaction between literature and cultural memory and the entanglement between local national and European identities at the highpoint of nation building

Science Fact and Science Fiction Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed **Specifications and Drawings of Patents Issued from the U.S. Patent Office** United States.
