

## MULTIVIEW DRAWING

### The Alphabet of Lines in Technical Drawing

Lines in technical drawings are part of a specialized graphic language that is standardized throughout industry. Each type of line has a very precise symbolic meaning. Correct usage of this "alphabet of lines" is essential whether you use traditional drafting methods or CAD.

**Line weight** is the thickness of the line.

**Construction lines and guide lines** are very light, easily erased lines used to block in the main layout.

**Visible lines** are the edges or "outlines" of an object. They are drawn as solid lines with a thick/heavy weight.

All other lines contrast with the visible lines by having either a thinner weight and/or a combination of dashes.
