A Guide for the Study of Animals Worrallo Whitney, 2015-06-12 Excerpt from A Guide for the Study of Animals The following guide to the study of animals is intended for pupils in secondary schools It was prepared by the authors at the request of the Biology Round Table an association composed of the teachers of Biology in the Chicago High Schools to whom the authors wish to take this opportunity of expressing their appreciation of the many helpful suggestions and criticisms of the manuscript The time has passed when a high school course in zoology consists simply of a somewhat simplified edition of a similar course in college All teachers now recognize that the motivization of any course should be its adaptability to the

needs of the student and that zoology must be taught from the standpoint of the student rather than that of the subject In preparing this guide the authors have tried to keep these points in mind The matter of presentation the order of topics and the choice of material has been much discussed but the trend of opinion has finally set in toward an ecological rather than a type study of animals that there should be in the case of young students a brief study of rather a large number of animals to bring out some general biological law rather than an exhaustive study of a very few types About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
