The authors were invited to select a key problem area in the field and to emphasize practical issues in their chapters. The result is a work of outstanding variety and depth of coverage with an immediately useful, hands-on focus. Topics include ethical considerations in clinical personality assessment, assessment of racial and ethnic minorities, and assessment of the elderly, among many other key topics. A practical, context-based approach is maintained throughout, and a useful Appendix providing an index of psychological assessment procedures concludes the book.
