The Emergence of Stability in the Industrial City Martin Hewitt,2016-12-05 The rapid eclipse of Chartism and the relative tranquility of the period 1848 67 has been one of the most enduring puzzles of nineteenth century British history This book takes a fresh look at this conundrum treating the period between the Reform Acts of 1832 and 1867 as a coherent whole for the first time It suggests that previous depictions of 1848 as a watershed in British history have both exaggerated the nature of the transitions which occurred at mid century and have over estimated both the collapse of radical attitudes and the fading of working class resentment The experiences of the Manchester working class show that poverty unemployment and hardship persisted through the mid Victorian boom While some workers may have taken advantage of economic opportunities and the various movements of social and moral reform promoted by the middle class to acquire respectability in general attempts at middle class moral imperialism brought only marginal changes to popular culture and attitudes Instead it is argued the roots of the radical collapse and of political stability lie elsewhere in the initial failure of radical leaders to sustain a firm consensus on effective strategies of reform and in changes in the political culture of the mid century city which closed off spaces in which independent working class politics could continue to function In the context of the most important industrial city of the era this study provides a wide ranging analysis of the complex forces which forged the uneasy compromise on which mid nineteenth century stability rested *Archeological Investigations in Skagway, Alaska:*
