**New Mechanics and New Electromagnetism of Axiomatized** Wang Jianhua,2025-03-24 At the beginning of the 20th century the world famous mathematician Hilbert suggested deducing all the theorems of physics using mathematical axiomatization However for more than 100 years mathematicians and physicists have not accomplished this great scientific dream Many people are skeptical about the suggestion of axiomatizing physics The author has established a new axiomatic system of physics consisting of six axioms based on physical experiments Many famous theorems of physics can be deduced from the new axiomatic system For example 1 The new universal gravitation formula viz 2 A new formula for the magnetic field force viz In addition the authors have designed three very simple optical experiments based on the principle of lasers and the theory of interference of light which will directly verify whether the principle of special relativity of the invariance of the speed of light is correct or incorrect
