Applications of Quantum Mechanical Techniques to Areas Outside of Quantum Mechanics. 2nd Edition

Emmanuel Haven, Andrei Khrennikov, 2019-11-14 This book deals with applications of quantum mechanical techniques to areas outside of quantum mechanics so called quantum like modeling Research in this area has grown over the last 15 years But even already more than 50 years ago the interaction between Physics Nobelist Pauli and the psychologist Carl Jung in the 1950 s on seeking to find analogous uses of the complementarity principle from quantum mechanics in psychology needs noting This book does NOT want to advance that society is quantum mechanical The macroscopic world is manifestly not quantum mechanical But this rules not out that one can use concepts and the mathematical apparatus from quantum physics in a macroscopic environment A mainstay ingredient of quantum mechanics is quantum probability and this tool has been proven to be useful in the mathematical modelling of decision making In the most basic experiment of quantum physics the double slit experiment it is known from the works of A Khrennikov that the law of total probability is violated It is now well documented that several decision making paradoxes in psychology and economics such as the Ellsberg paradox do exhibit this violation of the law of total probability When data is collected with experiments which test non rational decision making behaviour one can observe that such data often exhibits a complex non commutative structure which may be even more complex than if one considers the structure allied to the basic two slit experiment The community exploring quantum like

models has tried to address how quantum probability can help in better explaining those paradoxes Research has now been published in very high standing journals on resolving some of the paradoxes with the mathematics of quantum physics The aim of this book is to collect the contributions of world s leading experts in quantum like modeling in decision making psychology cognition economics and finance 2013 International Conference on Computer Science and Artificial Intelligence Dr. Yuetong Lin,Dr. Gabriel Alungbe,2014-11-16 The main objective of ICCSAI2013 is to provide a platform for the presentation of top and latest research results in global scientific areas The conference aims to provide a high level international forum for researcher engineers and practitioners to present and discuss recent advances and new techniques in computer science and artificial intelligence It also serves to foster communications among researcher engineers and practitioners working in a common interest in improving computer science artificial intelligence and the related fields We have received 325 numbers of papers through Call for Paper out of which 94 numbers of papers were accepted for publication in the conference proceedings through double blind review process The conference is designed to stimulate the young minds including Research Scholars Academicians and Practitioners to contribute their ideas thoughts and nobility in these two disciplines Australian National Bibliography ,1995-09 **Current Index to Journals in Education** ,2000 Managing Organizations for Sustainable Development in Emerging Countries Angappa Gunasekaran,Charbel José Chiappetta Jabbour,Ana Beatriz Lopes de Sousa Jabbour,2017-10-02 Managing Organizations for Sustainable Development in Emerging Countries focuses on the main challenges and opportunities of managing firms and emerging economies in the light of sustainable development One of the key questions of sustainable development is how organizations from developing countries are achieving their economic goals while considering simultaneously environmental issues like conservation of natural resources eco efficiency biodiversity conservation and climate change mitigation These questions are relevant for government industry and urban sustainability However in the modern literature that discusses organizational management for sustainable development few studies focus on the reality of organizations from emerging countries Moreover changing environmental legislation in emerging countries such as China and Brazil will affect organizational managers In this context this book may contribute to organizational management in the search for more sustainable organizations as well as deal with the challenges of managing organizations in the context of increased social problems degradation of natural resources loss of biodiversity and climate change This book was published as a special issue of the International Journal of Sustainable Development World Ecology **British Scientific and Technical Books** ,1956 **Westlaw Database Directory** Sondra J.
