Subject: Meeting Request – GEAR UP Alumni Leadership Academy

Dear **(SCHEDULER NAME)**:

I hope this e-mail finds you well. As a GEAR UP (Gaining Early Awareness and Readiness for Undergraduate Programs) alum, I am writing to request a meeting with **(MEMBER OF CONGRESS)**. I will be in Washington, DC, Jun 22-29 attending the GEAR UP Alumni Leadership Academy (GUALA), hosted by the National Council for Community and Education Partnerships (NCCEP).

I would very much like to visit with my Member of Congress to share my GEAR UP story and the many successes of **(GEAR UP SITE NAME)**. I am available to meet on Wednesday afternoon, June 26, 2013, between 1:00 PM and 4:30 PM.

Hopefully **(MEMBER OF CONGRESS NAME)** or somebody from (HIS/HER) staff is available to meet with me. Please let me know where and what time works best. Thank you.

We look forward to hearing back from you soon!

Best,

A Copyright Masquerade Monica Horten, 2013-08-08
When thousands marched through ice and snow against a copyright treaty their cries for free speech on the Internet shot to the heart of the European Union and forced a political U turn The mighty entertainment industries could only stare in dismay their back room plans in tatters This highly original analysis of three attempts to bring in new laws to defend copyright on the Internet ACTA Ley Sinde and the Digital Economy Act investigates the dance of influence between lobbyists and their political proxies and unmasks the sophistry of their arguments Copyright expert Monica Horten outlines the myriad ways that lobbyists contrived to bypass democratic process and persuade politicians to take up their cause in imposing an American corporate agenda In doing so she argues the case for stronger transparency in copyright policy making A Copyright Masquerade is essential reading for anyone who cares about copyright and the Internet and to those who care about freedom of speech and good government

Right By Design Ed Henshall,2023-03-10 Product design is becoming increasingly challenging as product complexity increases dramatically with the advent of autonomous control and the need to achieve zero emissions Companies continue to have poor product launches with significant numbers of recall campaigns and high after sales warranties It is important that potential product failures are identified and fixed during the design of a product Failure modes found after the design has matured are normally easy to find with some being identified by the customer but are often difficult and expensive to fix modifying one part will often have a knock on effect on other parts

causing other problems Discovering failure modes early in the design process is often difficult requiring rigorous and comprehensive analysis but once found such failure modes are usually easy and cheap to fix This book presents an approach to product design based on Failure Mode Avoidance that utilises a series of strongly interrelated engineering tools and interpersonal skills that can be used to discover failure modes early in the design process The tools can be used across engineering disciplines Despite engineering being largely a team activity it is often the case that little attention is paid to the team process after the team membership has been identified with membership normally being based on technical expertise In addition to technical expertise an effective engineering team requires individual engineers to work together efficiently Good leadership is also required with the leader able to both manage change and encourage individual team members to work to the best of their ability This book interweaves technical skills team skills and team leadership in a way that reflects their real life interrelationship The book tells the fictional story of a small engineering team and its leader as they implement the skills introduced in the book and follows their experiences reflecting individual difficulties enthusiasm humour and scepticism in applying the methodologies and tools for the first time In addition the story tells of team members interactions with their management and peers within a company that having been very successful finds itself in financial difficulties It promotes constructivist learning through the reader empathising with the characters in the book These characters ask questions that are typical of those that learners will ask about the subject matter Learning reinforcement is also integrated into the storyline as a natural and unobtrusive feature
