*How to Read Texts* Neil McCaw, 2013-11-21 Now covering multi media texts and practical advice on essay writing and independent research this is an essential guide to critical reading at university level *Assessing Academic Literacy in a Multilingual Society* Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience *The Routledge Companion to Teaching Music Composition in Schools* Kirsty Devaney, Martin Fautley, Joana Grow, Annette Ziegenmeyer, 2023-08-18 The Routledge Companion to Teaching Music Composition in Schools International Perspectives offers a comprehensive overview of teaching composing from a wide range of countries around the world Addressing the current state of composition pedagogy from primary to secondary school levels and beyond the volume explores issues including different curricular and extracurricular settings cultural aspects of composing aesthetics musical creativity the role of technology and assessment With contributors from over 30 countries this volume encompasses theoretical historical empirical and practical approaches and enables comparisons across different countries and regions Chapters by experienced educators composers and researchers describe in depth the practices taking place in different international locations Interspersed with these chapters interludes by the volume editors contextualize and problematize the teaching and learning of composing music The volume covers a range of contexts including formal and informal those where a national curriculum is mandated or where composing is a matter of choice and a range of types styles and genres of musical learning and music making Providing a wide ranging and detailed review of international approaches to incorporating music composition in teaching and learning this volume will be a useful resource for teachers music education researchers graduate and undergraduate students and all those working with children and young people in composing music

**High-Stakes Testing in Education** Theo J.H.M Eggen, Gordon Stobart, 2015-10-14 High stakes educational testing is a global phenomenon which is increasing in both scale and importance Assessments are high stakes when there are serious consequences for one or more stakeholders Historically tests have largely been used for selection or for providing a licence to practise making them high stakes for the test takers Testing is now also used for the purposes of improving standards of

teaching and learning and of holding schools accountable for their students results These tests then become high stakes for teachers and schools especially when they have to meet externally imposed targets More recent has been the emergence of international comparative testing which has become high stakes for governments and policy makers as their education systems are judged in relation to the performances of other countries In this book we draw on research which examines each of these uses of high stakes testing The articles evaluate the impact of such assessments and explore the issues of value and fairness which they raise To underline the international appeal of high stakes testing the studies are drawn from Australia Africa the Caribbean Europe former Soviet republics and North America Collectively they illustrate the power of high stakes assessment in shaping for better or for worse policy making and schooling This book was originally published as a special issue of *Assessment in Education Principles Policy Practice* **Kaapse bibliotekaris** ,2012 Issues for Nov 1957 include section Accessions Aanwinste Sept 1957 **Extended Curriculum Programmes** Tennyson Mgutshini ,2022-04-30 The introduction of ECPs in South African Universities is seen by many as South Africa s key strategy for addressing the problem of poor patterns of student success and has its basis on the uncontested acceptance that an extended study duration may be necessary to bring some categories of learners to a level of parity with the readiness expectations of their course of study Even so this transformative strategic imperative has been plagued by a range of challenges that include poor systems readiness poor selection mechanisms in the identification of ECP students poor numeracy and literacy amongst students and indifferent teacher involvement in ECPs This volume offers a rare insight into many of the above recognised challenges and in so doing provides critical matter for thought for educators within the higher education sector **Annual Performance Plan** Mpumalanga (South Africa).
