Geography Paper 1 2014 Scope:

What Is Geography? Alastair Bonnett, 2023-06-23 Geography is fundamental to understanding the way the world works. This text offers readers a short and highly accessible account of the ideas and concepts constituting geography. Including discussion of both the human and the natural realms, the text looks at key themes such as environment, space and place, as well as geography's methods and the history of the discipline, showing us how and why they are essential for a thriving planet. Introductory but not simplified, Bonnett provides students with the ability to understand the history and context of the subject without any prior knowledge. This short, elegant book will be of interest to all readers intrigued by the geographical imagination.

Seeking Accountability for the Unlawful Use of Force Leila Nadya Sadat, 2018-05-31 Despite the conclusion of the International Military Tribunal at Nuremberg that aggression is the supreme international crime, armed conflict remains a frequent and ubiquitous feature of international life, leaving millions of victims in its wake. This collection of original chapters by leading and emerging scholars from all around the world evaluates historic and current examples of the use of force and the context of crimes of aggression. As we approach the 75th anniversary of the Nuremberg War Crimes Tribunal, *Seeking Accountability for the Unlawful Use of Force* examines the many systems and accountability frameworks which have developed since the Second World War. By suggesting new avenues for enhancing accountability structures already in place, as well as proposing new frameworks needed, this volume will begin a movement to establish the mechanisms needed to charge those responsible for the unlawful use of force.

Datapolis Paul Cournet, Negar Sanaan Bensi, 2024-02-05 DATAPOLIS looks into the materiality of data, its inherent ethical and political contradictions, as well as cultural and environmental footprints, by following two main trajectories: the first one attempts to define what the cloud is and how it operates, from the systems and infrastructures behind the Internet to the apparatus, gizmos and buildings that can transcend scales and temporal dimensions. The second one explores how data penetrates our existence, not only by affecting the ways we live and work or design and make cities, but by offering distinct ways of life and organization that otherwise would not have been possible. Through various visual and textual materials, this book speculates on the ways in which architecture can engage with data and digital technology beyond its mere instrumental use in making smart cities. DATAPOLIS is edited by Paul Cournet and Negar Sanaan Bensi. With contributions by Kees Kaan, Kate Crawford, Shannon Mattern, Ruha Benjamin, Marina Otero Verzier and Joost Grootens, it is the most complete version of this work, published in 2023 by nai010.

Breaking up the Global Value Chain Torben Pedersen, Timothy M. Devinney, Laszlo Tihanyi, Arnaldo Camuffo, 2017-08-18 Recent developments are challenging the traditional separation between advanced and emerging economies as hosts of knowledge and production-intensive activities, respectively. Authors assess whether the co-location of R&D and manufacturing is critical for development and innovation.
