Teaching and Learning Secondary School Mathematics Ann Kajander, Jennifer Holm, Egan J Chernoff, 2018-10-24

This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators. It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada. The chapters address topics of broad applicability such as technology in learning mathematics, recent interest in social justice contexts in the learning of mathematics as well as Indigenous education. The voices of classroom practitioners, the group ultimately responsible for implementing this new vision of mathematics teaching and learning, are not forgotten. Each section includes a chapter written by a classroom teacher, making this volume unique in its approach. We have much to learn from one another, and this volume takes the stance that the development of a united vision, supported by both research and professional dialog, provides the first step.

The Report: Abu Dhabi 2016 Oxford Business Group, 2016-05-09. Subdued oil prices prompted a trimmed federal budget for 2016 as the UAE, like other countries in the region, tightened its belt in response to falling hydrocarbons revenues. However, a sustained focus on economic diversification and targeted investment in Abu Dhabi's key non-oil sectors in recent years means the emirate is well positioned to weather the storm. Looking forward, plans for future development are mapped out in Abu Dhabi Economic Vision 2030, a comprehensive economic policy document that aims to reduce dependence on oil and gas, thereby creating a more sustainable, knowledge-based economy for the emirate and its inhabitants. Aided by hydrocarbons reserves that are among the world's largest and substantial financial resources, Abu Dhabi has built up a strong foundation to become a regional leader and an increasingly important global player in a wide variety of sectors, including oil and gas, financial services, health care, aviation, and renewable energy.
