

Considerations for Group, Concurrent, and Individual Therapy

The Centers for Medicare & Medicaid Services (CMS) supports the clinical judgment of the practitioner. Refer to coverage rules by the payer for more details.

Individual Therapy	Group Therapy	Concurrent Therapy
Clinical & Regulatory Overview		
Should be the primary mode of evaluation and intervention.	Appropriate for clients when implemented to address client-specific goals.	May be appropriate for some clients and some goals.
Clinical Considerations		
<p>The typical 20 intervention session should be individual.</p> <p>Any occupation-based intervention that includes safety concerns is likely best completed in an individual setting.</p>	<p>Provide interventions in group to the right clients at the right time.</p> <p>When identifying clients for group interventions, provide an activity analysis of the group intervention considering the clients:</p> <ul style="list-style-type: none"> - Individual goals & current functional capacity - Psychosocial needs and benefits of treatment in group - Functional cognition & sensory impairments (e.g. vision, hearing) <p>Carefully consider the number of clients in the group. More complex clients or clients with lower functional capacity may benefit from a smaller group.</p> <p>Clients at different stages of rehabilitation may benefit from being together in groups to share the lived experience and recovery through rehabilitation.</p> <p>The group intervention should be directed at a specific goal in each client's plan of care. (The goals do not need to be the same or even similar for all clients.)</p> <p>Each client in the group should be able to meaningfully participate with the assistance of the practitioner throughout the group interventions; must be skilled and medically necessary.</p>	<p>Interventions should be directed at a specific goal for each client.</p> <p>The interventions must be skilled and medically necessary.</p> <p>Essential when clients are working on mastering a skill or occupation. Should be avoided for novel interventions and any time hands-on assistance is needed.</p> <p>Concurrent therapy may only be a portion of an intervention session and is adjunct to individual interventions.</p> <p>AOTA anticipates concurrent interventions to be the least often implemented mode of occupational therapy.</p> <p>Medicare Part B does not recognize concurrent interventions.</p>
Documentation Considerations		
<p>Documentation should demonstrate the skill and distinct value of occupational therapy.</p> <p>See AOTA's Documentation & Reimbursement Resources: www.aota.org/Practice/Management/Tools.aspx</p>	<p>Documentation of group interventions should include:</p> <ul style="list-style-type: none"> - how the prescribed skilled therapy services contribute to the patient's anticipated progression toward individualized goals. - why group is the most appropriate mode of therapy for the person - how the group therapy is medically necessary and appropriate to the needs of each beneficiary. <p>When groups are provided in a skilled nursing facility (SNF) setting, there is a requirement for a explicit justification for the use of group rather than individual or concurrent therapy. The description should include, but need not be limited to:</p> <ul style="list-style-type: none"> - the specific benefits to that particular person - the documented type and amount of group therapy - how the prescribed type and amount of group therapy will meet the patient's needs and assist the patient in reaching the documented goals. 	<p>Clearly document the portion of therapy in the intervention session that was provided concurrently.</p> <p>Clearly document the time that is skilled intervention and is directly connected to at least one individualized goal in the plan of care. Note that a client performing tasks independently is typically not skilled therapy.</p>
Skilled Nursing Facilities: New Definitions and Special Considerations for Medicare Part A		
<p>A minimum of 20% of therapy must be provided one-on-one.</p> <p>Individual therapy is the preferred mode of therapy provision and should be considered the standard of care in therapy services provided to SNF residents." (CMS, 64 Fed. Reg. 38728, 38745-38754, 2019)</p>	<p>A maximum of 20% of therapy may be provided in group and concurrent therapy combined.</p> <p>"Under the SNF PFI, group therapy will be defined as (an individual) qualified rehabilitation therapist or therapy assistant treating two to six patients at the same time who are performing the same or similar activities." (CMS, 64 Fed. Reg. 38728, 38745-38754, 2019)</p>	<p>A maximum of 20% of therapy may be provided in group and concurrent combined.</p> <p>"Therapy is provided to two patients by one therapist or therapy assistant doing different activities." (CMS, 64 Fed. Reg. 38728, 38745-38754, 2019)</p>
<p><small>As the PFI# final rule (CMS, 2019) states, "An expert therapist is determine the frequency, duration, and medicality of therapy based on usual clinical reasoning and the individual needs of each patient." (64 Fed. Reg. 38728, 2019, at 38745-38748)</small></p>
