Part 1: Diagnostics

- Take the free diagnostics for all subjects
 - Math
 - Grammar
 - Vocabulary
 - Biology

Review your results

For topics where you scored well, check those the answer and try some additional practice to strengthen your skills going into week 2.

For topics where you scored lower than you intended or than you are comfortable with, look for areas for all of the material covered to review throughout the month leading up to your exam.

For the areas you did not take your study assessment and diagnostic results, if you were able to identify an area of concern, you can also find that area in the course content and take your study plan accordingly to make sure you have time to review those.

You can also take topics which you scored lower on the diagnostic to come back to later in the month so that you have more time to review them.
