

Mendel's Marshmallow Monster Genetics

Mendel's Marshmallow Monsters

Welcome, geneticist! In this lab, you will act as a genetic scientist to determine the physical traits of a unique creature, the marshmallow monster. You will use a dice to randomly select alleles from two "parents," which will determine your creature's genetic code, or **genotype**. From this code, you'll discover its physical characteristics, or **phenotype**, and build your own marshmallow monster!

Key Terms:

- **Allele:** A specific version of a gene, represented by upper and lowercase letters. Example: A or a
- **Dominant Allele:** The allele that always shows up if present. It's represented by an uppercase letter.
- **Recessive Allele:** The allele that only shows up if two copies are inherited. It's represented by a lowercase letter.

Marshmallow Monster Genetics

Characteristics	Dominant allele	Dominant phenotype	Recessive allele	Recessive phenotype
Body size (large marshmallows)	B	Large (2 body sections)	b	Small (1 body section)
Head (wide marshmallows)	F	Coned	f	White
Tail (long candy)	L	Present	l	Absent
Eyes (small candy)	E	2 eyes	e	3 eyes
Spines (long string)	O	Present	o	Absent

How:

Roll a die for each characteristic, and a die for each parent. If the number shown is odd, the dominant allele. If the number shown is even, it is a recessive allele. Repeat this process for each characteristic. Combine the alleles and record the resulting genotype in your data table. Build your Marshmallow Monster according to your data table. Make notes with a partner to see if you can predict the phenotype of your Marshmallow Monster.

Engaging hands-on activity using dominant & recessive alleles to make an edible creature
