Our organization has developed principles guiding how QAPI will be incorporated into our culture and traditions how we do our work. For example, we can say that QAPI is a method for approaching decision making and problem solving rather than considered as a separate program. Notes:					
Our organization has identified how all service lines and departments will utilize and be engaged in QAPI to plan and do their work. For example, we can say that all service lines and departments use data to make decisions and drive improvements, and use measurement to determine if improvement efforts were successful. Notes:					
Our organization has developed a written QAPI plan that contains the steps that the organization takes to identify, implement and sustain continuous improvements in all departments, and is revised on an ongoing basis. For example, a written plan that is done purely for compliance and non-referenced, would not meet the intent of a QAPI plan. Notes:
