The Deceptive Brain Robert L. Taylor, 2021-10-29 Preposterous as it sounds we are not who we seem to be Not even close At the heart of this misperception is our deep seated conviction of free choice Based on emerging neurobehavioral science findings The Deceptive Brain makes the case for human experience as a narrative illusion an executive summary of sorts that emerges from an incredibly complex brain The Deceptive Brain drills down on what this finding means for the way we blame and punish and presents a bold alternative approach to criminal justice based on blameless responsibility

The Invention of Communication Armand Mattelart, 1996 A tour of the multiple usages and systems that each historic period puts forth in the name of communication This genealogy maps the many means by which humans interact from cataloguing others to asserting power over them to working together with them to build new forms of community Included are topics such as the elaboration of warfare as a logistic the rise of professional societies of propaganda and national propagation the history of universal expositions and world fairs the birth of documentary and film out of physiological investigations in the 19th century the development of press and the popular novel and the origins of American social science The history runs from the circuits of exchange to the circulation of goods people and messages from the construction of railroads to the emergence of long distance communication The author brings a clarifying perspective to the ideologies and theories that accompany these transformations

The Nineteenth Century Brian Martin, 1989-08-29 The 19th century volume demonstrates the variety of English literature in an age of social intellectual religious and scientific ferment The shift to Romanticism is portrayed with extracts from major figures such as Blake Wordsworth and Coleridge and the contribution of women writers is fully recognised with selections from Jane Austen the Bronte sisters and Elizabeth Gaskell The anthology concludes with selections of Victorian poetry and extracts from Wilde and Stevenson and altogether offers a comprehensive sample of the vast treasure house of 19th century literature

Crime, Punishment, and Disease, 2001-10-31 Flew sees his work as complementary to Thomas Szasz s He applies a philosophical perspective to problems Szasz discusses as a psychiatrist Crime Punishment and Disease will be of particular interest to students of philosophy social welfare education and new developments in psychiatry and will be of direct relevance to criminologists

If you meet George Herbert on the road, kill him Justin Lewis-Anthony, 2013-01-17 Priestly ministry in the Church of England needs a radical rethink George Herbert died in 1633 His legacy continues His poems are read and sung and his parish ministry remains the model for the Church of England s understanding of how and where and why its priests should minister But there is a problem The memory of Herbert celebrated by the Church is an inaccurate one and in its inaccuracy is unfair on Herbert himself and his successors in the ordained ministry This is a book of the long view It sets out to assess realistically the context of Herbert s

life and to explore the difficulties of parish life today By examining the status and role of parish clergy since Herbert s time and today it draws on the work of historians social anthropologists psychologists and theologians and presents their ideas in a readable and passionate style It argues that the future strength of parochial ministry will be found in a recovery of historic renewed understandings of priestly ministry and concludes by outlining more sustainable patterns of practice for the future In a climate of uncertainty for the future of the church it will be an encouragement for priest and people and welcomed by both
